DETAILED ACTION

Response to Argument

This office action is in response to Appeal Brief filed on April 24, 2004. Original application contained Claims 1-18. Therefore, presently pending claims are 1-18.

Applicant's argument for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

Drawings

The drawings filed on November 22, 1999 are objected, and subject to correction of the informalities indicated on the attached "Notice of Draftsperson's Patent Drawing Review," PTO-948.

Allowable Subject Matter

1. Claims 1-18 are allowed.

2. The following is an Examiner's statement of reason for allowance:

The above mentioned claims are allowable over prior arts because the CPA (Cited Prior Arts) of record fails to teach or render obvious the claimed limitations in combination with the specific added limitations, as recited in independent Claims 1, 3, 5, and subsequent dependent claims.

Art Unit: 2131

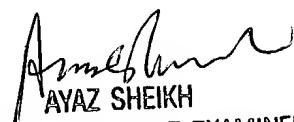

The CPA do not teach or suggest a system, method and apparatus for detecting an attempt to install an unauthorized non-proprietary device on a non-proprietary bus that is coupled to a proprietary bus within vehicle environment.

This new system verifies control access between a device on a non-proprietary bus and a device on a proprietary bus within a data processing system.

The present invention addresses the drawback of prior art *proprietary scheme* defined by individual Control Area Network (CAN) users, such as when application layers are linked to physical medium by the layers of various emerging protocols. Thus, this present invention also address drawback of *not restricting access to a proprietary bus* in order to limit any liability from the actions that may be caused by inappropriate commands sent on a proprietary bus.

Thus this invention further enhances and protects communication between two independent buses within data processing environment by providing a mechanism to determine whether a portable, non-proprietary device has exceeded the number of registrations to more than on gateway controller authorized for that device

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
